DSCSA Transaction Data Clarification and Compliance Letter

The federal Drug Supply Chain Security Act (DSCSA) wholesaler deadline is upon us. We are thrilled to be an Authorized Trading Partner and Wholesale Distributor under DSCSA and to inform you how it is improving our industry. We are required to obtain and provide specific information for most prescription drugs as they pass through the supply chain and Tri-Pharma's custody. This Transaction Data collectively includes the product's Transaction Information, Transaction History, and Transaction Statement, as defined by the DSCSA. This will hold us and everyone else in our industry to a very high standard of accountability.

Beginning no later than July 1, 2015, Dispensers, *your facility*, will be obligated by the DSCSA to make lot-level product tracing a standard part of most change of ownership and must be prepared to provide any applicable Transaction Data upon request by the FDA, a State, or other Federal agency, in the event of a recall or an investigation into suspect or illegitimate products.

We are 100% compliant and as such have retained TrackTraceRX, an established DSCSA Compliance Software vendor, to store our customers' Transaction Data on a secure and encrypted cloud service. Your Transaction Data is available to you at any time. Please ask your sales representative for further details on how we can save your facility money and time complying with the DSCSA.

We are eager to continue being your steady, reliable, and supportive wholesaler by helping you stay ahead of drug shortages and recalls which will solidify Tri-Pharma as a leader in specialty wholesalers. We recognize there are other companies available, yet you choose to keep Tri-Pharma as your preferred supplier. Thank you for your trust.

Please let us know if you have any questions so we can answer them immediately.

With warm regards,

Todd Infante
President

"Your Preferred Pharmaceutical Wholesaler"
